

STAINLESS STEEL EXHAUST SYSTEM FOR KAWASAKI Z1300 – KZ1300 - ZG1300

The ultimate exhaust system manufactured from *exhaust grade* Stainless Steel and electrically polished to beautiful shine.

The system replaces the original while allowing all the features (center stand, large oil pan, oil filter change without dismounting exhaust) to remain the same.

The system is fixed to original mountings, no special tools required.

It has been manufactured using custom made jigs and pressing tools and has been tested on bikes to ensure correct function and sound.

The system eliminates the small mufflers underneath the oil pan, replacing them with a connecting pipe which improves the breathing of the engine.

The downpipes are single wall; the inner diameter of the pipe is larger than the original which further enhances the breathing.

Using the sport mufflers increases the breathing to a new level and creates a unique six cylinder sound.

Full system with original size mufflers

Full system with sporty mufflers

The down pipes will change color slightly to golden shade due to the special Stainless Steel used, this is a feature that we want to make you aware of before ordering.
